PROFILE

Thanks to SheCodes and the Meta Front-End Developer courses, I have been able to venture into frontend development and have loved the journey so far. I am self motivated, hard-working, willing and able to learn quickly.

PROJECTS

2023   Dictionary Web Application

- A responsive dictionary application that allows the user to search any word and get the definitions with pictures.
- Made with React, HTML, CSS
- Found at: https://chipper-fairy-acf453.netlify.app/

2023   Hamburg Landing page

- A responsive travel website on desktops, tablets and mobiles. Equipped with easy navigation to guide users with built-in Google Maps, and links to the airport and the city's public transport system.
- Made with React, HTML, CSS
- Found at: https://hamburg-landing-page.netlify.app/

2022   React Weather Web Application

- A responsive application built with React.The app helps to check the weather in various cities in the world.
- Made with React, HTML, CSS
- Found at: https://whimsical-paprenjak-2dee7c.netlify.app/
